WORK EXPERIENCE

(Sep2018-Present)

Machinery Safety Specialist

Omron Europe , İstanbul

Main purpose is visiting existing and potential customers all regions in Turkey and supporting them in order to build machine more safely.

(December2015–Nov2017)

Technical Support Engineer at Technical Support Department

Omron Europe , İstanbul

My responsibility in technical support team was giving technical support for Safety , Sensor and Component products during 2 year. It's a backoffice position givin support via phone or remote connnection. I supported customers in terms of wiring of products or software interfaces such Sysmac Safety , G9SP Configurator , OS32C Configurator , Cx-Thermo and for some measurement sensors.

(January 2015–Aug2015)

Internship at Technical Support Department

Omron Europe , İstanbul

(Nov2014–June2015)

Representative student of Mechatronics Engineering

Bahçeşehir University

(July2014–Sep2014)

Omron PLC Programmer at Basic Level

Kur Otomasyon (Omron OEM Partner)

Kur Otomasyon is OEM Partner of OEE-TR. Company working with variety of machine builders (packaging,shrink,body sleeve etc) where they need to automate their system. While i working there i learned electrical design and implementations on electric cabinets which include many automation products Plc , Hmi , Drive , Safety etc. During 2014 i started to program basic for basic projects.

(June2013–Sep2013)

Arrange Electric Panels and Assembly on Machines

Kur Otomasyon (Omron OEM Partner)

Kur Otomasyon is OEM Partner of OEE-TR. Company working with variety of machine

builders (packaging, shrink, body sleeve etc) where they need to automate their system. While i working there i learned electrical design and implementations on electric cabinets which include many automation products Plc , Hmi , Drive , Safety etc. During 2014 i started to program basic for basic projects.

EDUCATION
