ASSOCIATION OF AUTOMOTIVE PARTS & COMPONENTS MANUFACTURERS

*Making Occupational
Schools stronger is
our most important and valuable
investment in the future of our sector.*

Dear Industrialists,

We know quite well how important technical high schools are in Turkey. However, while expecting the students studying at these schools to work as mid-level employees and technicians in the manufacturing industry, given the technical information and skills they acquire, because of the schools' financial inadequacies and budget cuts, they graduate from the schools without having obtained the necessary practical experience.

Moreover, as the result of the first negative experience they have on the job or in the field, they reach the point of leaving the sector.

It is for these reasons that four years ago, TAYSAD decided to work towards improving technical vocational high schools, and thus created the ADMOG project.

ADMOG is a social responsibility project that aims at providing technical vocational high schools with the machines and equipment they need by collecting donations from industrialists and, after making sure they are in

working order, send them to the schools that need them.

This year, the procurement of equipment, which is the most crucial part of this project, will be achieved through your donations, as it has been in the preceding four years. Our goal is to assemble new or usable 2nd hand tools, equipment, machines, and supplies that we have used in our manufacturing businesses under the auspices of our association, and then make them available to Technical High Schools that need them, thereby serving to contribute to the personal development of students studying at them.

You can be certain that the effectiveness of the project depends directly on your support, effort and charitability. The more you support us, the more successful our project will be and you will acquire a sense that you are an important part of this sacred duty.

With the best regards,

Çağatay Dündar
ADMOG Project Co-Leader

Dear Industrialists and TAYSAD Members,

In terms of the values Turkey creates, we have never sufficed with only contributing to the development and progress of the country. Most of the time, we have made something out of nothing and have worked towards producing values that will benefit our beautiful country, to support it and to maintain its continuity.

Through the ADMOG project, which was launched by TAYSAD and has gained momentum due to the contributions of our valuable members, we have sincerely supported, are supporting, and will continue to support the practical occupational training of our youth, who are the guarantee of our future.

It has made us all happy to have made a difference in our schools by providing them with equipment and machines donated through our project, which has been continuing for four years. The project has become an example of the synergy created by our industrialists working together.

We want to not only keep going but get stronger.

Donating your used items to our project not only makes up a fraction of your budget, it makes an enormous contribution to the practical training of youth. We enthusiastically await your continued support through new donations.

It must be known that due to your valuable donations, our youth are taking steps toward mastering their trade and achieving the rewards for having done so.

At this juncture, I want all of us to share in the pride of helping our young people acquire a profession and the pleasure of contributing to our country's industry.

Özge Özen Kural

WHAT IS ADMOG?

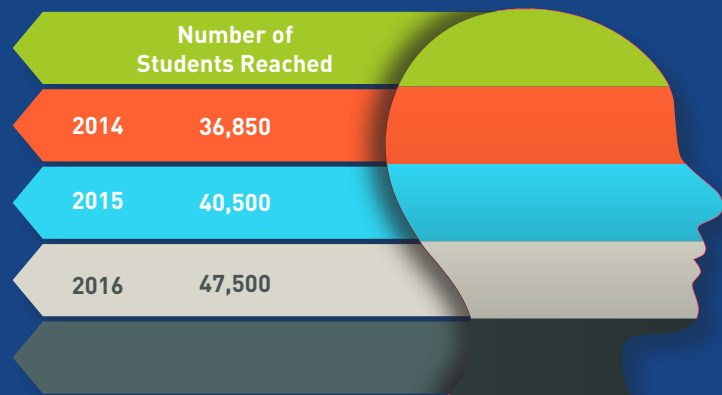

- **ADMOG is a social responsibility project run by TAYSAD to support technical vocational education.**
- **The key aim of this project is to serve as a means to train qualified workers for industry.**
- **ADMOG is a completely voluntary initiative that reinforces the cooperation between industry, businesses and schools.**
- **Participation in the project is through the donation of new and used tools and machines.**
- **Through this project, businesses and schools work together towards the acquisition of skills.**
- **It is a project that is not only open to TAYSAD members but also all industrialists.**
- **Since 2013, when it was started, the project has made it possible for 5,224 tools to be sent to 215 schools in 81 provinces.**

How ADMOG did begin?

ADMOG got off the ground in 2013, when 8 automotive supply industry companies that were members of TAYSAD provided 6 Technical High Schools with such needed supplies as measuring devices and laboratory equipment. In subsequent years, this number grew with the participation of other members. In 2017, we decided to expand this successful social responsibility project.

Our goal is to continue the previous year's success and to take donated equipment to technical high schools in 81 provinces.

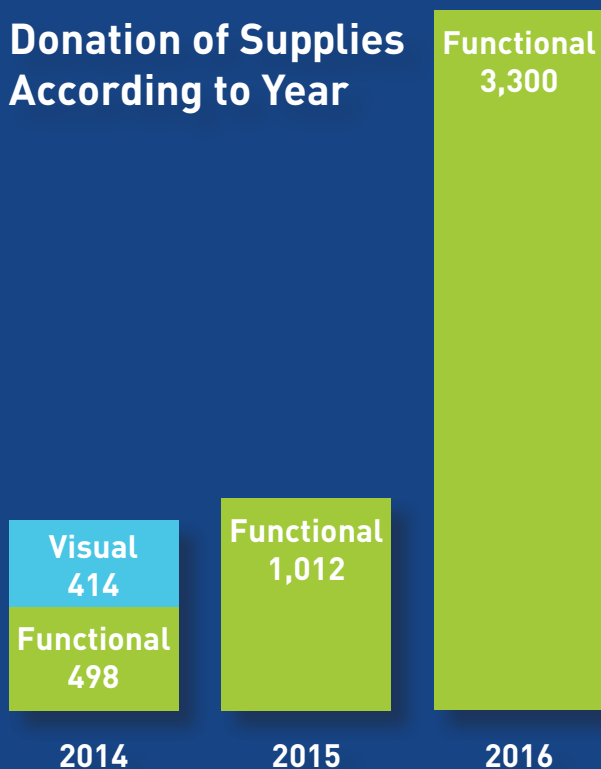

ADMOG's change over the years

	Company	School	Province	Students (Total)	Supplies	Contribution
2013	8	5	3			
2014	60	53	41	36,850	912	250,000
2015	57	76	42	40,500	1,012	549,530
2016	160	81	81	47,500	3,300	1,103,000
TOPLAM	285	215	81	124,850	5,224	1,902,530

Donated Supplies

Supplies	2014		2015	2016
	Functional	Visual	Functional	Visual
Calipers	148	169	196	451
Digital Calipers	144	88	172	464
Micrometer	110	40	198	287
Comparator	16	84	133	163

Torque Wrench	10	5	33	36
Manometer (Normal-Oil)	9	4	1	42
Thermometer (Digital-Manual)	2	2	8	15
Pneumatic Piston)	10			
Machine			5	
Vehicle Engine			4	6
Other	44	20	246	1,822
Total	498	414	1,012	3,300

Donation of Supplies According to Year

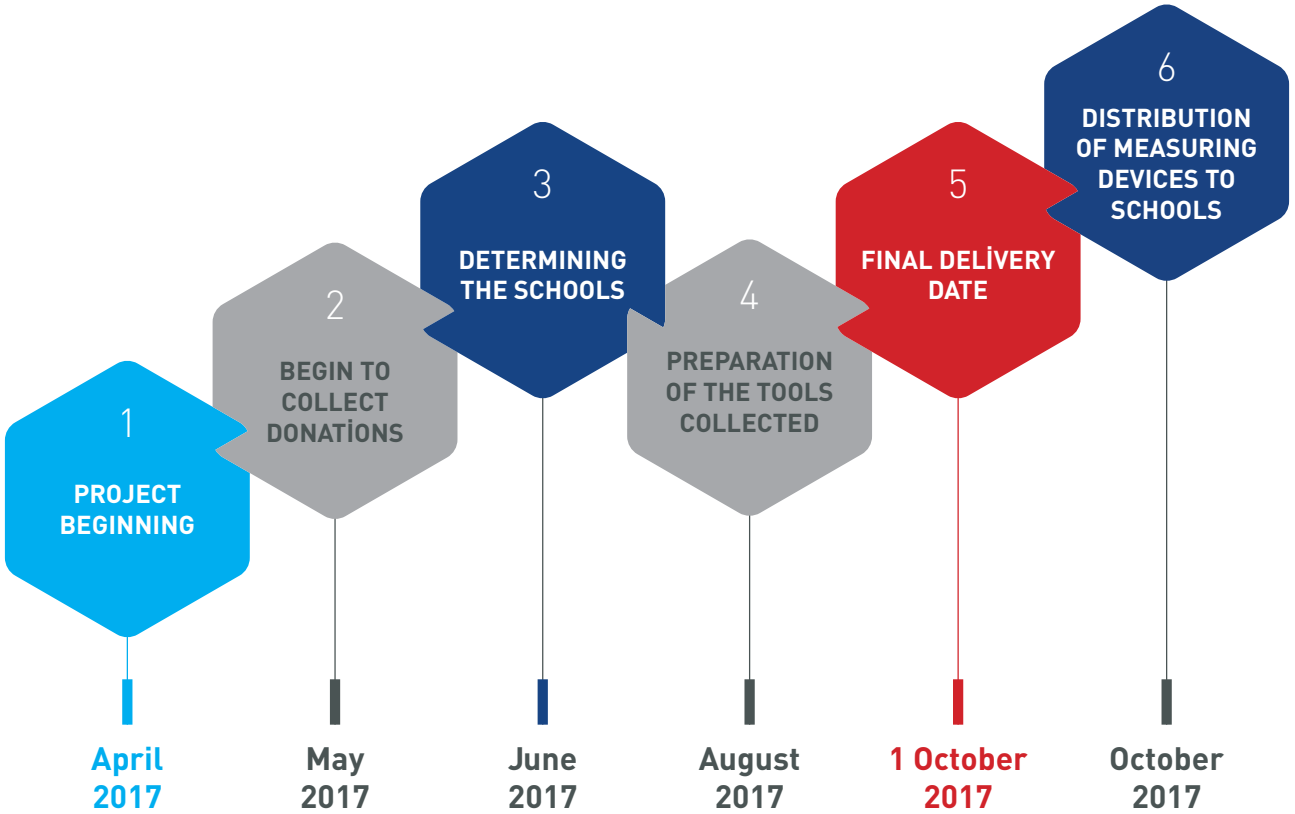

Which tools?

Our ideal in the ADMOG project is to collect tools that create added value in every area of manufacturing and to get them to technical schools. However, we decided to concentrate on tools and equipment that would not be logistically problematic when it comes to storage and distribution. At the first stage, we aim at creating and sharing a stock of machines, measuring devices and laboratory equipment that can make up for what technical schools lack.

Machines, measuring devices and laboratory equipment, which are non-calibrated but in working condition and portable, are collected from industrial entities and sent to schools the Ministry of Education has determined to be in need of. They include:

-
- Calipers
 - Micrometer
 - Marking Gauge
 - Comparator Meters
 - Calibration Master
 - Electronic Precision Balances
 - Microscopes
 - Profile Projection
 - Hardness Tester
 - Digital/Analog Multimeter
 - Spectrometer
 - General Traction Test Device
 - Metallographic Sample Preparation Unit
 - Ultrasonic Test Device
 - Surface Roughness Measurement Device
 - Marking Devices (steel ruler, scribe, spot, compass, etc.)
 - Metal Cutting Equipment (cutting points, tool post, Gribber, etc.)
 - Contactor
 - Relay Switch
 - Time Switch
 - Excessive Current Switch
 - Fuse (single phase+group)
 - Asynchronous Engine (3 phase and single phase with reductor)
 - Control Button (start, stop, jog)
 - Sensor (all kinds)
 - Base, Communtor, Vavien Key
 - Outlet
 - Various Electronic Components (tarnsistr, tristor, triak, condenstor, etc.)
 - PLC
 - Frequency Invertor
 - Cable (bell wire, 1,5mm, 2,5mm, TTR, etc.)
-

What are ADMOG's goals and time plan for achieving them in 2017?

“ YOU DO THE DONATING, WE WILL GET IT TO THE RIGHT PLACE! ”

After carefully packaging the new or used tools and/or machines marked for donation, send them, along with a list of these items to our address by **1 October 2017 at the latest:**
