

# SPEED OF LABOR

*IN CONNECTION WITH MANUFACTURING EFFICIENCY*

*BY SZABOLCS KARASZEK DR.*

# THE MAGIC NUMBER

1.82

# MANUFACTURING EFFICIENCY

---

„the ability to do or produce something without wasting materials, time or energy”

---

$$E_{ff} = \frac{\text{TOTAL MINUTES PRODUCED} \times 100}{\text{TOTAL HOURS WORKED} \times 60}$$

MANUFACTURING EFFICIENCY

EFFICIENCY OF EMPLOYEES

# SPEED

---

„the distance covered per unit of time”

---

$$v = \frac{d}{t}$$

# istance

1. an interval between two points in time
2. a gap, space, or interval between two points
3. to do better or more

$$v = \frac{d}{t}$$

# THE MAGIC NUMBER

The background is a deep blue gradient. On the right side, there is a bright, glowing light source that creates a series of concentric, wavy lines radiating outwards. These lines are composed of a fine grid pattern, giving the impression of a digital or technological environment. The light source is positioned in the upper right quadrant, and its glow extends across the right half of the image, creating a sense of depth and movement.

**THANK YOU**
